

Baking Paper Sheets

Introducing Capri's highest quality European silicon baking paper sourced directly from Finland. Manufactured for the professional baker that will only accept the best. The perfect replacement for all standard silicon papers, baking papers and vegetable parchment papers.

Thanks to the very good release properties of Capri Baking Paper, you can use the same paper for baking as well as for interleaving and freezing.

Using Capri Baking Paper means that food does not stick to oven trays resulting in less washing up since no oil is needed. Depending on the pastry, you can use a sheet of baking paper several times.

You can also use baking paper for interleaving, decorating, rolling out and freezing. Thanks to its very good release properties, you can use the same paper to take pastries and bread from freezer to oven. Furthermore, Capri Baking Paper is also suitable for the microwave and panini grill.

Bakeries love Capri for preparing patisserie and dough as well as for protecting, tooling and stencilling.

- Baking
- Interleaving
- Decorating
- Rolling out
- Freezing and more
