have a leak resistant seal
and seals in moisture

Premium clarity
and presentation

Why switch to recycled PET?

Show commitment:

Demonstrate to customers you really are committed to corporate social responsibility and the environment.

Consumer preference:

Research shows that consumers display a preference for brands and retailers that use recycled content in their packaging. Recycling plastic content can help to build brand loyalty and change perceptions.

Maintain quality:

Packaging products in recycled materials is possible without compromising performance, physical properties, storage stability or visual appeal.
